

**Table legend**

- Blue =** This activity is important when starting a community.
- Beige =** This activity should be done in the lifetime of a community.
- Red =** This activity is recommended at the end or when ending a community.

**Financing Modalities: The "How much?"**

<b>17</b> Financing
How is the community financed?
Detailing: Is there a budget for the community events, e.g. for room rental, catering, external speakers, etc.?
Detailing: Is it ensured that the participants can do this in their working time?
Is budgeting at risk? Example: Due to change in management.

**THE BANK**

**COMMUNITY CLUB**

**Values, success factors, community brand: How are the goals addressed? The "How"**

<b>3</b> Values	<b>4</b> Content
What values and principles is the community committed to?	What are we doing and how does it pay off against the stated goals?
<ul style="list-style-type: none"> <li>Do the community's values and principles have broad support?</li> <li>Are they representative for the EA in the organization or do they only reflect one faction? It is not uncommon, especially in established EA, to have disputes about direction and differences of opinion regarding scope, working methods, content, etc.</li> </ul>	What is the need of the community members?
<b>5</b> Brand	<b>6</b> Success factors
How does the community present itself?	How does the community define success and how is it measured? Examples:
How does it express itself and how does it communicate to the outside world?	<ul style="list-style-type: none"> <li>How long do members stay in a community on average?</li> <li>How many comments do they post?</li> <li>How many users actually participate in actions?</li> </ul>
What are the main target groups for external communication?	

**HOUSE OF HOW**

**TEMPLE OF WHY**

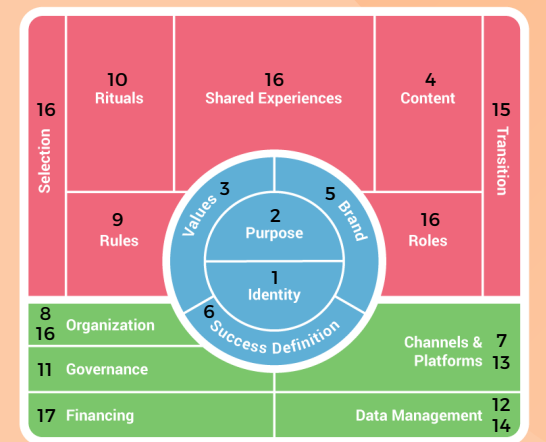

**GARDEN OF GOVERNANCE**

**RITUAL RANGE**

**The Community Canvas: Basis for structure and mapping**

The Community Canvas - <https://community-canvas.org/> -  
 With kind permission and thanks to:  
 Sascha Mombartz - <http://closeknit.co/> und  
 Fabian Portmüller - <http://together.is/>

**Goal and Identity: The "Why"**

<b>1</b> Identity & Motivation	<b>2</b> Purpose & Goal
What is the vision/mission of the community? (The other questions result from this or are settled with it.)	What is the purpose of the Enterprise Architecture Community? (external purpose - given)
Connecting interest/activity of the participants (motivation, common goals)	How does the community contribute to the implementation of the corporate strategy? How does it help promote EA's goals and missions?
How or through what do community participants connect?	What does the community want to achieve? (internal purpose - to be elaborated)
<ul style="list-style-type: none"> <li>Is there an explicit vision or mission on which the community's identity and motivation can be based?</li> <li>Can the orientation of the community be questioned on this basis?</li> <li>How unchangeable is the vision or mission in the face of changing framework conditions for the EA (e.g., agile architecture)?</li> </ul>	<ul style="list-style-type: none"> <li>What is my starting point and where do I want to go with the community?</li> <li>How does the company change when the community exists?</li> <li>How does the community change the lives of its members?</li> </ul>
	<ul style="list-style-type: none"> <li>What specific objective is addressed/fulfilled? (short-term, in a specific time span/iteration) Example: promote Architectural Thinking in the short-term/medium-term vs. IT business convergence in the long-term.</li> <li>Do the community goals apply to the entire EA discipline in the organization?</li> <li>Detailing: Are the goals of the community in line with the previous values represented by EA?</li> <li>If there is a tension - is this a conscious decision, e.g. to initiate cultural change and transformation?</li> </ul>
	Once the vision/mission/goals have been achieved, are there new goals for the community to work on?

**Responsibles and participants: The "Who?"**

<b>15</b> Participants	<b>16</b> Organization
Are the community participants all "practitioners", i.e. here specifically architects or enterprise architects? Or is the group of participants extended, for example, by other stakeholders of the EA?	Is this an open or closed community?
Is a membership limited in time or endless?	What are the entry barriers/entry criteria for the community?
How are alumni dealt with?	Which target audience should be addressed?
How are passive members managed?	Who is the organizer/host?
Are there enough (active) participants/people interested?	Are there other contributors to the community?
	How can one register to the community?
	Which functions/roles must be ensured so that the community can survive?
	Who is responsible for what?

**Format and content: The "What"**

<b>12</b> Format	<b>13</b> Channels & Platforms
<ul style="list-style-type: none"> <li>What needs to be supported by the format?</li> <li>Is there information input into the EA through presentations?</li> <li>Does the collaboration of enterprise architects serve to further develop architecture topics or initiatives?</li> <li>How do we create space for asynchronous exchange? Example: Chat function in teams.</li> </ul>	<ul style="list-style-type: none"> <li>What is the concrete offer for the community?</li> <li>What format?</li> <li>Where does the target group exchange information today, and how can this be harnessed?</li> <li>How important is direct networking and direct personal exchange?</li> </ul>
<b>14</b> Data Management	
What conditions must be created, to keep the data DSGVO-compliant?	
What requirements must be met in order to be compliant with existing works agreements? (Coordination of the topic with the works council.)	
How is the membership data kept up to date?	
How can members search for and find other members in the Community?	
What data from members is required?	
How does the community handle the knowledge and data in the community itself?	
Are work results made available to others in or outside the EA, including interim results (transparency principle)? Example: Are protocols accessible to the entire organization?	
Is (valuable) content/results achieved through the community?	

**Rituals, frequency, venue, and governance: The operational "How"**

<b>7</b> Channels & Platforms	<b>8</b> Organization
Channels & Platforms: Venue/virtual space	Organization: Frequency, duration
<b>9</b> Rules	<b>10</b> Rituals
What can members expect from the community? What is allowed? What is not allowed?	What rituals exist in the community - online and offline?
What are the rules of the game?	Which rituals reflect the values of the community?
What is the procedure if someone violates the rules of the community?	
<b>11</b> Governance & Steering	
Who is moderating the community?	Who makes decisions in the community (budgets, tooling, etc)? How are they made?
What governance applies to the community?	How are conflicts in the community dealt with?
